CINEMATIC WEDDING FILMS
PRICING & INFORMATION BROCHURE

Hey! I'm Tim
i'm a wedding Photographer & Cinematographer
based in london.

Capturing the beautiful weddings for my couples is everything for me. I take huge pride in every wedding, image that tells a beautiful story, capturing the best bits throughout your whole day, all wrapped up in film and photo prints you can look back on forever.

i will love to celebrate your day with you by capturing it in the best way possible on latest high end equipments. i hope to change your perception of what you'd expect from your average wedding videographer.

This brochure highlights the best of what i offer as your wedding photographer /videographer. By this point, i imagine you've already seen examples of my works - if not - i recommend viewing my photos on my website, the wedding sub-menu or the wedding films page. I now offer a selection of wedding packages depending on how you'd like to remember your day. if it's something you would like to learn more about, i'd love to chat with you about how i can help capture your wedding.

PHOTOGRAPHER & CINEMATIC VIDEOGRAPHER

What you'll receive

Before your day

We'll discuss your wedding plans and catch up via video call in the run-up to your day,

Hands on, all day

I'll be with you all day, from prep to your guests dancing. For me, telling a full story is key to making sure your story is complete. I'll be guiding you through any prompts and suggestions for natural results.

Digital & Physical

I believe that even in this digital age, it's always nice to have something physical of memories to hold. Your wedding pictures/ film would be presented to you in a keepsake box. Inside is your USB with a photo album A3 sized.

Cinematic aerial shots

Nothing adds more to a film than breathtaking aerial views. I love to capture a few seconds of incredible 4k opening shots with my lightweight drones to set the scenes of your wedding day. Please note though; drone footage is subject to time limitations, venue permissions, location, weather & safety checks and may not be guaranteed or permitted in some regions.

Colours & music that moves you

Every shot I capture is intentional; with thought given to composition, lighting and movement. I frame and edit each shot with the latest colour grading techniques.
